Updating BOT

To Update the BOT,

- Download New Version of the BOT from the Website
<http://bdo.r23.ru/restrict/download.php>
- Or use the Update from Bot Settings.

- Copy fb.ini file from the old BOT folder to the new BOT folder.

- And Start the BOT.

Fb.ini file contains all your bot setting so you won't have to set them up again.

If you are updating the Bot using the Update function in Bot you don't need to copy fb.ini file. It will be automatically be copied over.

[Jump to Table Of Content](#)

Prerequisite

NOTE: Make sure to enable the 3 marked settings to stop unnecessary issues.

[Jump to Table Of Content](#)

Alt + Escape To Quit the BOT

Well there is nothing much for this.. because it is self-Explanatory. So here is a special for you. ^_^

[Jump to Table Of Content](#)

Alt + 9 Bot Settings

Have all the settings you need to setup the BOT

General Settings:

Bot Settings

https://bdo.r23.ru - Black Desert Online Fish Bot ver. 2.0.00

General Fishing Auto Sell / Repair / Back Processing Grinding Food / Alchemy

Language: English (US)

Server Region: EU/NA (English Client)

Report Screen: Yes

Use Control Hotkey with Shift: No To affect Restart Bot

Disable AZERTY layout: No

Auto Check Update: Yes

Auto Delete Temp: Yes

Email:

Program Key:

Secure Bot Test Bot Update Key Verification

Cancel Save Save And Reset Counts

Language: Select the BOT language

Server Region: Select your Game Region

Report Screen: Default: Yes: Show bot status in Top Left corner of the game window.

Use Control Hotkey with Shift: Default: No: To use all bot Hotkey with additional SHIFT press.

Example: SHIFT+ALT+1 to unpause/pause bot instead ALT+1

Disable AZERTY Layout: If you are using a keyboard with AZERTY Layout then you need to Enable this or set it to Disabled.

Auto Check Update: Check for New version of Bot every time you start the Bot.

Auto Delete Temp: Deletes the Temp Folder which is inside the Bot Folder every time you exit the Bot.

E-mail: Enter you email which you used to activate the BOT here.

Program Key: This is where you enter the key which you receive when you activate the BOT trial or buy the BOT. You can find this key in your email or go here

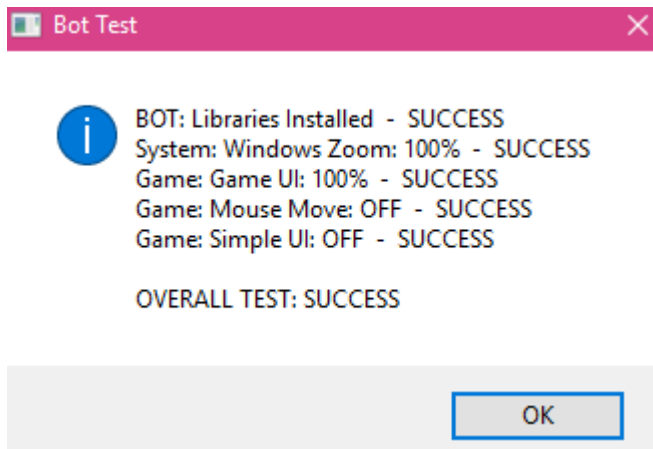

<http://bdo.r23.ru/restrict/payment.php> Here you can find the key Under "User Key".

[Jump to Table Of Content](#)

Secure Bot: Use this to give the bot an added security.

Test Bot: Use this to check your game settings and windows settings are set properly so the bot can work properly. If everything is set properly you should get a message like this

Update: Use this to update the bot to the latest version.

Key Verification: Use this to verify your bot key and to check your key expiry date.

[Jump to Table Of Content](#)

Auto Fishing Settings:

Types of Fish to catch: Select what grade of fish you want the BOT to take. Bot will automatically drop the fishes other than the selected grade.

Get Fish Till Free Slots: Lets you choose till how many slots the bot can take fish.

Take the Relics: No matter what enable this. ^_^

Take the Keys: Enable this to take Silver Keys.

Take Expensive Fish: Enabling this will make BOT take Expensive rare fishes like Coelacanth, Luvar etc. This feature is independent to the other “Types of fish to catch”. i.e even if you set “Types of fish to catch” to don’t take fish. The BOT will take this Expensive fish.

Event Loot: Here you can select which all special Event items you want the BOT to take while fishing. You can select Multiple Items by either Ctrl clicking them or dragging it from one to another or by pressing and holding Shift key selecting from one item to another.

*It is advised to select only the current event items. Because selecting multiple items will make the BOT process slower.

Dry Fish: Turn this on if you want to dry the fish.

Trash not Dried Fish: Turn this on if you want the bot to throw away fish that cannot be dried.

[Jump to Table Of Content](#)

Speed Input Captcha: This is for how fast the BOT types the Captcha while fishing.

Hooking: Hooking will make sure that the bot doesn't fail on the spacebar game and how fast/slow it works. Setting it to Default is enough for most of the players. But if you face any issues in BOT failing to press space or slow in typing the captcha Change into different setting and test it out.

Pause Before Fish: To set interval between each cast.

Cast Restart Time: To set the time for the Bot to restart fishing after its stopped.

Spend Energy: To use the inputted amount of energy while casting the rod.

Save Loot Screen: Enabling this will help the support and developer to debug any issues.

Del Broken Rods: Will automatically delete broken rods. For this to work properly turning off Auto arrange in inventory is advised.

Note:

Get Fish Till Free Slots: If the slots in Inventory is less than the give number then the bot stops taking fish. If the slots is higher than the given number then it takes fish. Set it to "0" if you want to use the Dry fish feature. Press Ctrl + f9 to check the free slots.

Dry Fish: Press Ctrl + f8 to force Dry Fish.

Pause Before Fish: If the 2nd time is lower than 1st time. Then it will use the 1st time as the only pause time.

Cast Restart Time: This Function is used to restart fishing after its stops. When other players hit you the bot will stop fishing and will start after the time set on Bot.

Cast Restart Time - Minutes

3 to 5 mins is the default time. Based on this time the bot will restart randomly. It can either start after 3 mins or 4 mins or 5 mins. If the 2nd time is lower than 1st time. Then it will use the 1st time as the only restart time.

Del Broken Rods: This function won't delete Repairable rods like Epheria, Balenos, Calpheon, Mediah Etc.

[Jump to Table Of Content](#)

Auto Sell/ Repair/ Back

Auto Sell/ Repair/ Back: Turn this on if you want to use this feature which Auto sells fish, relics, repairs rods, stores money in inventory and then goes back to fishing.

Run back to: Choose either horse or boat so that after selling and repairing the bot can auto path to horse or boat and start fishing again.

AutoPath Timeout: Set the autopath timeout. It will be useful when NPC is far away.

Action: Set of things the bot will do. Use the check box to the left of the function to enable or disable them. For example if you don't want to sell relics at marketplace then uncheck Relics 2 Auction.

Order: Choose in which order you want the bot to do these functions. For example if you want to bot to repair you rods at the end then give repair items order number 4 and change the relic/money 2 store order number to 3.

NPC Name: Leave this space blank if you want the bot to go to the nearest NPC. But if you want the bot to go to a specific NPC enter the name of a NPC. For example if you are fishing in calpheon and you want the bot to go to Basquean Ljurik.. then type this name in the box near Relic/Money 2 Store.

For Detailed Guide about Auto Sell/ Repair/ Back Click [here](#)

Auction Prices: Set either minimum or maximum or custom price for Silver keys and Relic Shard in which you want the bot to sell at market place.

Food/ Alchemy/ Pet/ Gathering Settings

The screenshot shows the 'Bot Settings' window with the 'Food / Alchemy / Pet / Gathering' tab selected. The window title is 'https://bdo.r23.ru - Black Desert Online Fish Bot ver. 2.0.00'. The settings are organized into sections: 'Durations of Food / Alchemy potions / Scrolls / PetFeed on Hotkeys' and 'Gathering Options'. The first section has three rows for different hotkeys (8, 9, and 0), each with fields for 'Every' (0), 'Minute' (1), and 'times at once' (1). The second section includes 'Milk Collection Time' (25 seconds), 'Shovel Hotkey' (0), 'Workers Recover And Repeat' (No), 'Repeat cooldown' (30 minutes), and 'Shutdown PC after' (0 minutes). At the bottom are 'Cancel', 'Save', and 'Save And Reset Counts' buttons.

| Durations of Food / Alchemy potions / Scrolls / PetFeed on Hotkeys | | | | |
|--|---|-------|---|------------------------|
| set 0 to Disable HotKey | | | | |
| Hot Key | 8 | Every | 0 | Minute 1 times at once |
| Hot Key | 9 | Every | 0 | Minute Delay 0 Minutes |
| Hot Key | 0 | Every | 0 | MinutesDelay 0 Minutes |

| Gathering Options | |
|----------------------------|------------|
| Milk Collection Time: | 25 Seconds |
| Shovel Hotkey | 0 |
| Workers Recover And Repeat | No |
| Repeat cooldown | 30 Minutes |
| Shutdown PC after | 0 Minutes |

Hotkey: The first one is specifically set for pet food. But you can use other food too.

Set after how many minutes you want the BOT to use the food. And if you want to combine two food which share the same Cooldown set the delay.

Milk Collection Time: Default 25 seconds. How much time you need to play milk mini game. Time is changed When your gathering level goes up.

Workers Repeat: Enable this if you want to continue using the Workers.

Repeat Cooldown: Set the interval so the BOT can reuse the workers after the set minutes.

Shutdown PC: If you would like to turn off you PC after a few hours set the time based on when you want to turn it off.

[Jump to Table Of Content](#)

Statistics Page

This Page is purely for showing off purposes hehe... It will have all kinds of information like how long you are fishing, How many relics you got, How many gold fish you got etc.

NOTE: Make sure to Click on the save Button after setting up the BOT. Save and Reset Counts button is to save the bot setting and reset the statistics page to default. That is with no information.

[Jump to Table Of Content](#)

Alt + 1 Auto Fishing

- Open Inventory
- Close the equipment section
- Equip a rod
- Press Alt + 1
- The Bot will start working

NOTE:

Always carry spare fishing rods in inventory.

Make sure the rods are at the visible part (top rows are advised) of the inventory. Because the bot cant scroll down the inventory.

If you enabled Del Broken Rods then make sure to uncheck Auto Arrange in Inventory.

If you need any tips on Fishing spots Check <https://bdo.r23.ru/restrict/tips.php>.

For more Information click Check [Fishing Bot Guide](#).

For more Info on BOT settings Click [Me](#).

[Jump to Table Of Content](#)

Dry Fish:

- Turn on Dry Fish
- Set “Get Fish till Free Slots” to “0”
- Turn on Trash Not Dried Fish
- The bot will start to Dry the fish when you have 3 inventory slots

Note:

If you already have inventory full of fish. Then don't turn one Trash not Dried Fish instead press Ctrl + f8 to force dry fish.

Turn off Screensaver in game Settings or the bot will stop working.

The Higher Processing level you have you get chance for more dried fish per try.

For more Info on BOT settings Click [Me](#).

[Jump to Table Of Content](#)

Auto Sell/ Repair/ Back:

- Turn Auto Sell/ Repair/ Back in Bot Settings.
- Choose Either Horse or a Boat for Run Back to.
- Enable/Disable the actions which you want the bot to do or not do.
- Change the order in which you want the bot to do particular actions using Order numbers.
- Take your Horse or Boat to where you are going to fish.
- Start fishing by Alt 1.
- When you have 2 free slots in inventory the bot will automatically do the functions one by one.
 - Auto Sell - The bot runs to the nearest Trade Manager and sells the fish.
 - Relics to Auction - The bot runs to the nearest Marketplace and collects the money from my listing and then registers relics if you have them in inventory.
 - Repair Items - The bot runs to the nearest repair merchant and repairs items in inventory.
 - Relic/Money 2 Store - The bot runs to the nearest Storage keeper and Stores the relics/money.
- After it did all these functions the bot will auto path to the Horse or Boat and starts fishing again.

Note:

This feature does not work if you are fishing in Sea. It only works on Land.

Use Ctrl + F7 to force the bot to do all the functions above without enabling it in the bot settings.

If you want to sell to imperial trader then you need to enter the imperial trader name.

For more info on Bot settings click [Me](#).

[Jump to Table Of Content](#)

Alt + 2 Auto Processing

Before you begin Process function:

- Off auto arrange in warehouse and inventory.
- Free first 5 slots in inventory
- Set material for process and select method
- Set count of items (if not use Process Costume)
- Set Row and Column of items
- Press ALT+2

Note 1: If u need to do more than 1 product, please begin use materials from end. Use material with high row after high column (if row same). Here next issue: after u use all material, all items after this material is moved to left.

Note2: if row or column = 0, this product not be process.

Note 3: Disable Screen Saver or else the Bot will Stop Working.

Quick guide video: <https://www.youtube.com/watch?v=Itixzr0Z0KY>

For more Info on BOT settings Click [Me](#).

[Jump to Table Of Content](#)

Auction Helper(Alt + 3, Alt + 4, Alt + 5)

Go to Marketplace.

Search for the Item you want. For example Value Pack.

Select the Item.

Now Turn on Auction Helper (Alt + 3 for Single items like value packs, Alt + 4 for stackable items like potion etc., Alt + 5 for getting items from the favorite list[Top 5 from the list] works with stackable and non-stackable items). The BOT will try to get you the value pack.

Check this video guide if you need more details.

<https://www.youtube.com/watch?v=CXJTRWpRi8>

Note:

Bidding is Purely RNG. So only if you are lucky you will get it. Or else you have to keep trying.

You have to stop the BOT once you got the item or else the BOT will keep buying the item till your silver goes down to 0. Or you set only specific amount for the item you need and keep the remaining silver somewhere else or convert them to gold bars.

To Setup Auction Helper Settings Click [Auction](#)

- Equip Shovel
- Press Ctrl + 9 to start the Bot

Note:

To use Shovel for Desert Digging you need to be level 30+.

Make sure to bring enough Purified Water and Star Anise Tea because every few minutes you get a debuff since you are in the desert. If you don't use these foods you will die. You can use bot to auto feed these [Click here](#) for setup.

You can keep digging as long as you have energy.

Troubleshoot

If bot does not work for you, before asking support, please do these simple steps:

1) Download from Microsoft and install vc12, vc13, vc15 packages

Visual C ++ to Visual Studio 2012 (<https://www.microsoft.com/en-us/download/xx?id=30679>)

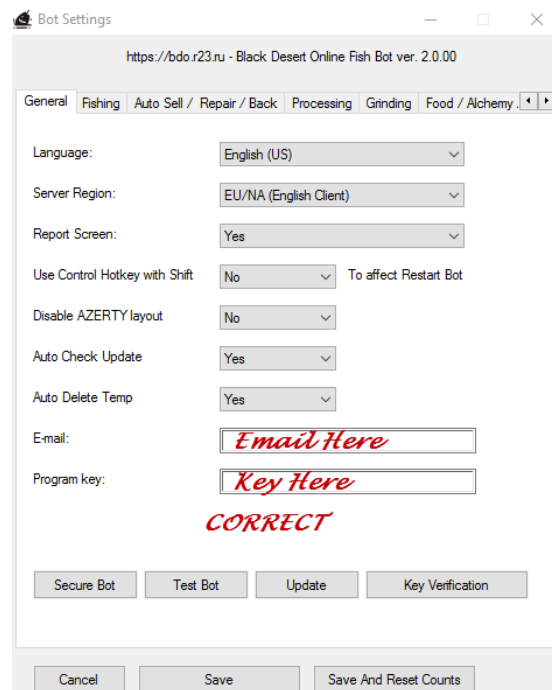

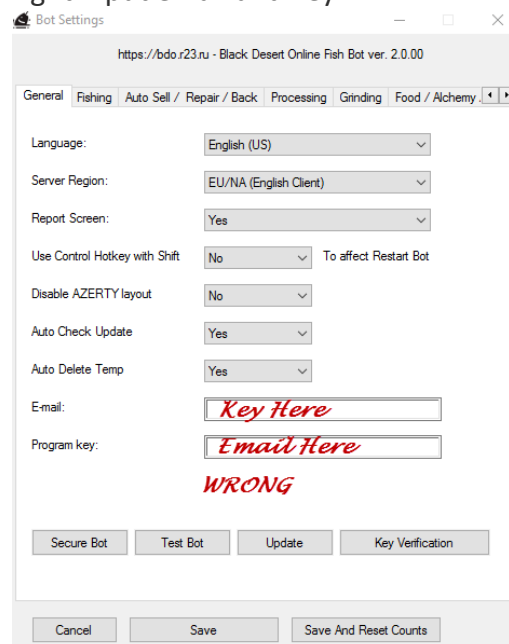

Visual C ++ to Visual Studio 2013 (<https://www.microsoft.com/en-us/download/xx?id=40784>)

Visual C ++ to Visual Studio 2015 (<https://www.microsoft.com/en-us/download/xx?id=48145>)

2) Authorization Error: 001

If you have this type of error, please check you right input email and key

[Jump to Table Of Content](#)

3) Check Game UI - it must be 100%

To correct it in game press

«Esc» -> Game UI -> Reset. «Esc» -> Game UI -> Set «100%» -> Save.

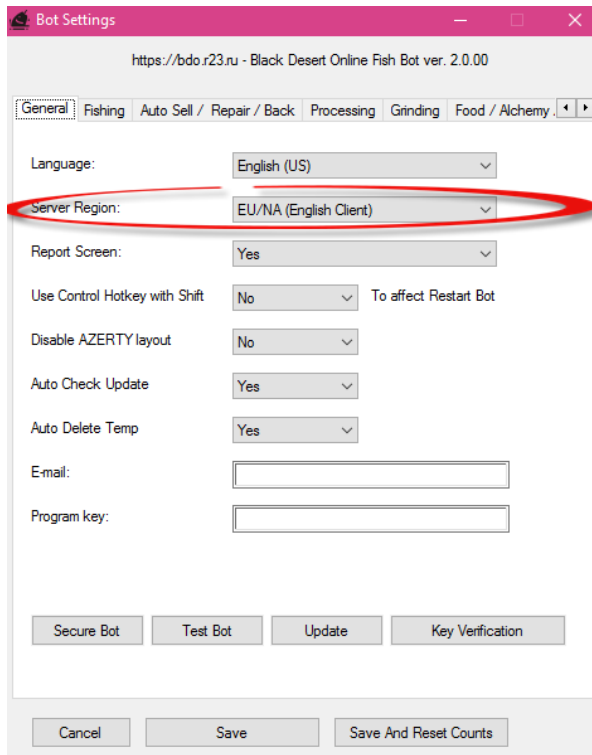

[Jump to Table Of Content](#)

4) Check right server selection

Check Server select in bot Setup «ALT + 9».

If server select right, in top/left corner of game u see «Bot Tooltip window». Please make sure «Tooltip» is inside game frame.

If «Tooltip» outside game frame - selected wrong server.

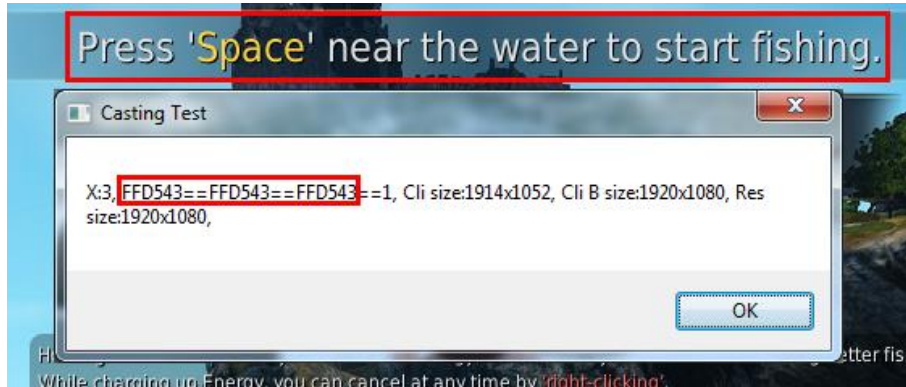

[Jump to Table Of Content](#)

5) Check right Video card settings

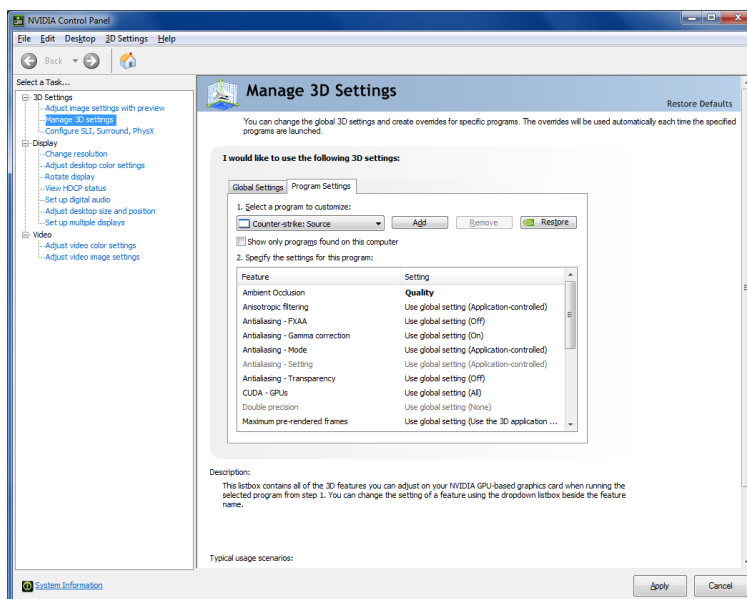

Get rod in hand near water. While u see title «Press Space near water to start fishing» press «ALT + F7». Check bot message: if message different then FFD543==FFD543==FFD543

You have 2 ways to correct it:

A)

1. Go to Nvidia Settings
2. Select “Manage3D Settings”
3. Select “Program Settings”
4. Select “Add”
5. Select “BalckDesert64”
6. Set all parameter “**Antialiasing**” to “Application controlled” or “**OFF**”
7. Save and restart Game

[Jump to Table Of Content](#)

B)

Reinstall video card drivers:

- Download Display Driver Uninstaller from here: [http://www.guru3d.com/files-details/dis ... nload.html](http://www.guru3d.com/files-details/display-driver-uninstaller-download.html)
- After that install new driver from [Nvidia](#) or [Amd](#) (Based on your video card).

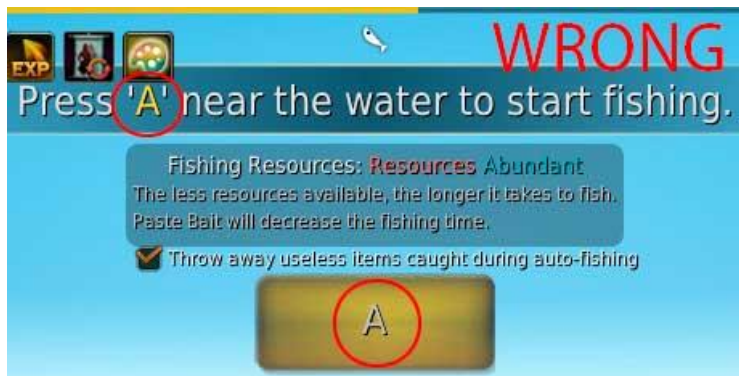

6) For TW server check font:

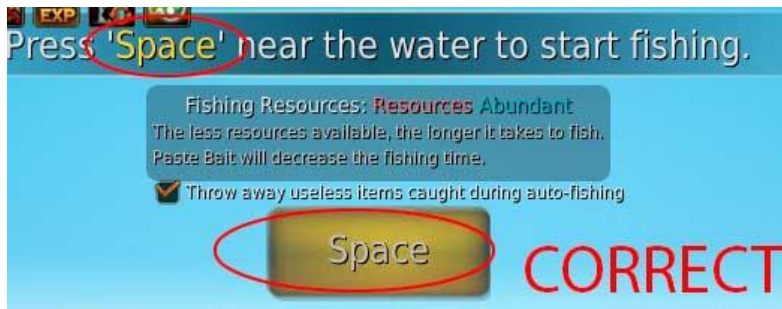

7) Using Gamepad

Bot not support gamepad. So if use gamepad, pls off it in setting before start bot.

If in titles for fishing press 'A' instead press 'SPACE', bot didn't work.

[Jump to Table Of Content](#)

To change this pls check game settings:

[Jump to Table Of Content](#)

8) Grind helper not work properly

For use Grind helper you need next:

a) Hp/Mana Bars must be on default place (As an image below). If u moved bars just do next:

Esc->Game UI-> Reset -> Game UI ->Save

b) Simplify UI must be OFF (As an image below):

[Jump to Table Of Content](#)

9) Error 9097

If you have 9097 please check your PC name. PC name may contain only English letters and digits.

If you change PC name, you need to restart PC.

10) Background Mode

You can't minimize the game while BOT is working. You can't use your mouse or keyboard while the BOT is working. If you want to use your PC then you have to use VM.

Follow this guide on how to use a VM

http://bdo.r23.ru/img/vmware_guide_for_running_bot_in_background.pdf

11) Bot does not recognize loot

Please make sure, that inventory window on default place.

Reset UI by «Esc» -> Game UI -> Reset. «Esc» -> Game UI -> Set «100%» -> Save.

12) Bot don't throw broken rods

Please make sure in Game Settings "Use Custom Quick Slot" is OFF

[Jump to Table Of Content](#)

13) Bot does not change my enchanted rods

Maybe your rod from your game server is not bot database. Just create screenshot of game in PNG format and send it to bdo@r23.ru

14) Bot does not Work With Different Fonts.

Change the Fonts back to Default.

15) Character Walking While Fishing.

To prevent the Character from walking while fishing Turn off **“Use Mouse Movements”** Under Game settings.

If even after trying the above steps your bot still doesn't work or you experience any difficulty to troubleshooting, please contact us.
